

tvPlayer as digital props for film and TV

WIP.

things to do

1. run the install script to:
 - install dependencies
 - run `python tvPlayer.py` on autostart
 - disable window "removable medium is inserted"

```
bash install.sh
```

2. disable (move/remove) autostart file for Eddy-G (if available) from folder
`~/.config/autostart`

old notes

- ~~2. on the desktop, open any folder, go to `edit > preferences > volume management`~~
- ~~3. something something LXDE autostart script `nano ~/.config/lxsession/LXDE-pi/autostart`~~
- ~~4. install script takes care of autostart and creates a file here: `~/.config/autostart`~~

SSH stuff

```
scp ./tvPlayer/* dp@192.168.1.209:~/Desktop/tvPlayer
```

```
ssh dp@192.168.1.209 'python ~/Desktop/tvPlayer/tvPlayer.py'
```

```
ssh dp@192.168.1.209 'DISPLAY=:0 python ~/Desktop/tvPlayer/tvPlayer.py'
```

```
scp -r ./tvPlayer/* dp@192.168.1.209:~/Desktop/tvPlayer && ssh  
dp@192.168.1.209 'DISPLAY=:0 python -u ~/Desktop/tvPlayer/tvPlayer.py'
```
